Employees per Security Officer (Retail)

Definition & Measurement Details

What is Employees per Security Officer (Retail)?

The total number of employees working at the company divided by the number of security officers working for the company at the same point in time.

Why should this KPI be measured?

Employees per Security Officer measures the ratio between the number of company-wide employees and the number of security officers working for the company. A lower than average value may be related to

How is this KPI calculated?

Two values are used to calculate this KPI: (1) the total number of employees working for the company, (2) the number of security officers working for the company at the same point in time. Formula: $\text{Employees per Security Officer} = \frac{\text{Total Employees}}{\text{Number of Security Officers}}$
