Finance Staffing Ratio

Definition & Measurement Details

What is Finance Staffing Ratio?

The number of company-wide employees divided by the total number of Finance Department employees working for the company at the same point in time. Finance employees typically include any staff working under the CFO within functions such as accounts payable, accounts receivable, accounting, financial reporting, treasury, tax, and budgeting/forecasting.

Why should this KPI be measured?

Finance Staffing Ratio (i.e., total employees per finance employee) measures staffing levels within the Finance Department relative to the total headcount of the organization. Finance Department headcount

How is this KPI calculated?

Two values are used to calculate this KPI: (1) the number of company-wide employees working for the organization, and (2) the total number of Finance Department employees working for the company at the
