On-time Supplier Delivery Rate

Definition & Measurement Details

What is On-time Supplier Delivery Rate?

The number of orders received from suppliers on or before the committed delivery date divided by the total number of orders received from suppliers over the same period of time, as a percentage.

Why should this KPI be measured?

On-Time Supplier Delivery Rate measures the reliability of the company's suppliers with regards to delivering shipments on-time. A relatively low value for this KPI may indicate that the company practices poor delivery

How is this KPI calculated?

Two values are used to calculate this KPI: (1) the number of orders received from suppliers on or before the committed delivery date, and (2) the total number of orders received during the same
