Scrap Expense as a Percentage of Plant Revenue

Definition & Measurement Details

What is Scrap Expense as a Percentage of Plant Revenue?

The dollar value of scrap produced during the manufacturing process (e.g., units that are scrapped due to errors or defects as well as excess materials that cannot be used) divided by the total dollar amount of revenue generated by the plant, or production facility, over the same period of time, as a percentage.

Why should this KPI be measured?

Scrap Expense as a Percentage of Plant Revenue measures the dollar value of scrap produced during the manufacturing process (e.g., units that are scrapped due to errors or defects as well as excess materials that cannot be used) divided by the total dollar amount of revenue generated by the plant, or production facility, over the same period of time, as a percentage.

How is this KPI calculated?

Two numbers are used to calculate this KPI: (1) the dollar value of scrap produced during the manufacturing process (e.g., units that are scrapped due to errors or defects as well as excess materials that cannot be used) divided by the total dollar amount of revenue generated by the plant, or production facility, over the same period of time, as a percentage.
