Cost per Underground Powerline Inspection

Definition & Measurement Details

What is Cost per Underground Powerline Inspection?

The total cost of inspecting underground powerlines divided by the number of underground powerline inspections conducted for the same location over the same period of time.

Why should this KPI be measured?

Cost per Underground Powerline Inspection measures the total cost of inspecting underground powerlines in relation to the number of underground powerlines inspected over the same period of time.

How is this KPI calculated?

Two values are used to calculate this KPI: (1) the total cost of inspecting underground powerlines, and (2) the number of underground powerlines inspected over the same period of time. This KPI includes all types of underground
